The R&D clock is running backward

Composite median R&D program duration: 8 years in 2016, 10 years in 2025
Source: Citeline Pharmapremia and IQVIA Institute, February 2026
Every added year is a year of lost protected revenue
This is published benchmark data you can cite in any sponsor meeting

Development time becomes commercial time

A launch pulled forward two years does not just save cost — it creates revenue
Two extra years before the LOE/patent cliff means two extra years at full commercial pricing
Annual sales x 2 added protected years = the incremental opportunity Watch: [ADD VIDEO LINK]

- **At $500M/yr**
- $1B incremental opportunity

- **At $750M/yr**
- $1.5B incremental opportunity

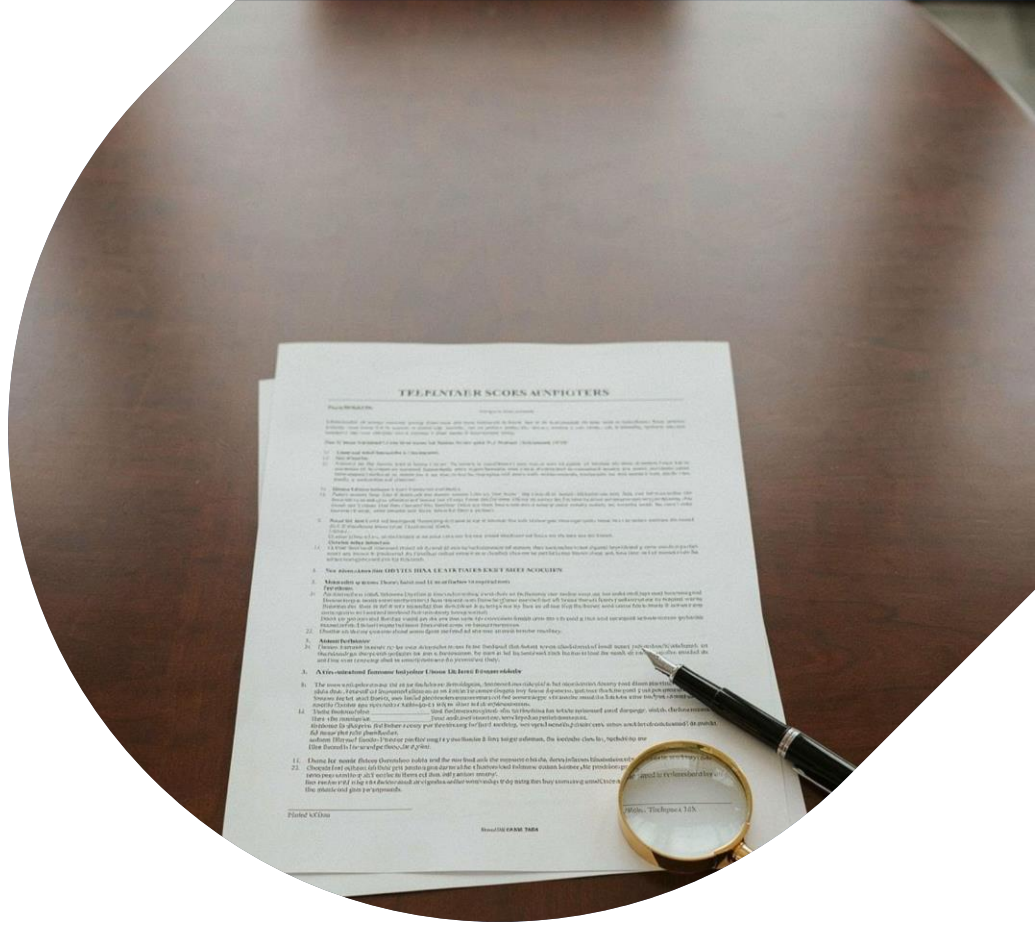

- **At $1B/yr**
- $2B incremental opportunity

The headline claim — and how to say it correctly

IQVIA Predictive Clinical Development can deliver up to two years off a 10-year program Always qualify: actual timelines vary based on program-specific factors and are not guaranteed Based on IQVIA analyses of client programs utilizing Predictive Clinical Development and adoption of IQVIA-recommended study delivery approaches

Overstating this claim creates legal and commercial risk — internalize the language exactly

Activity — make the math personal to your sponsor

Your voice instructor is ready to run a number-translation exercise with you

Tell your instructor the hypothetical annual sales figure for a sponsor asset you are working on

Your instructor will walk you through calculating that sponsor's specific incremental revenue opportunity

Ask your instructor to run the number-translation exercise with you now

Two delivery modes frame the entire solution

- **Inter-Trial Delivery**
- Enhanced program and study design — better decisions before execution begins
- **Four phases carry the acceleration:**
- Early Engagement
- Study Design and Strategy
- Start-Up
- Conduct and Close Out

- **Intra-Trial Delivery**
- Faster operational execution — speed and predictability through every phase
- **Four AI and data enablers underpin every speed claim:**
- Healthcare-Grade AI
- Process Optimization
- Libraries and Standards
- Protocol Digitization

Early Engagement — the entry point you can propose today

An 11-to-12-week framework that produces four concrete artifacts
Feasibility view, endpoint tradeoff matrix, country scenario models, risk register Sales move: anchor the conversation to one specific open decision the sponsor is wrestling with right now

- **Weeks 1–2**
- Align on open decisions
- **Weeks 3–6**
- Bring evidence and expert perspectives
- **Weeks 7–10**
- Stress-test feasibility and country strategy
- **Weeks 11–12**
- Finalize shared decision log

What IQVIA brings into the room

Listen: [ADD AUDIO LINK]

- **Real-world data and analytics**
- To ground feasibility, eligibility, and patient density assumptions
- **KOL and patient-advocacy networks**
- To pressure-test scientific and patient-experience choices
- **Regulatory intelligence and precedent**
- To evaluate pathway tradeoffs
- **Operational feasibility and country strategy modeling**
- Rooted in delivery experience

Study Design and Strategy — one integrated strategy eliminates handoffs

One single integrated study strategy removes functional handoffs, re-interpretation, rework, and delays

Key design elements: Critical to Quality Factors, data flow from collection to consumption, PROM-driven data review, patient insights

Close Out — speed from database lock to CSR

- **Database lock under 14 days**
- Driven by 81% faster data entry at sites and greater than 50% faster data cleaning
- **Greater than 90% fewer lab queries**
- With e-requisition
- **SDTM creation reduced from 8 to 6 weeks**
- Where 90% or more standards compliance is achieved
- **Tables, listings, and figures development reduced by 60%**
- Significant compression in reporting timelines
- **CSR narratives completed 35% faster**
- Clinical Study Report delivered in 8 weeks
- **Topline BIOS outputs**
- Available 15 to 20 days post database lock

The data ecosystem behind every speed claim

Daily automated data transfers from EDC, lab, IRT, eCOA, and connected devices into a centralized ODS
Real-time data cleaning, integrated RBQM, and automated issue generation
Cross-functional data review through a single platform: Clinical, DM, Biostatistics, Medical, Safety, Lab This is the operational infrastructure behind every metric — not a feature list

The AI roadmap — live now versus in development

Never represent an in-development tool as currently available — this is a firm boundary These demonstrate forward momentum and a credible technology trajectory

- **Live Now**
- Protocol Analyzer
- Enrollment Optimizer
- Regulatory Intelligence Assistant

- **In Development**
- Tools in development are evidence of continuous, roadmapped AI investment

Activity — metric recall drill

Your voice instructor will name a phase or a specific activity
Respond with the correct acceleration metric and time comparison
Your instructor will give immediate feedback and correct any errors
Ask your instructor to run the metric recall drill with you — repeat until you move through the full set without prompting

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

Two sponsor personas, two different conversations

Same solution, different frame — match the language to what each persona values most

- **Emerging Biopharma**
- Accelerate proof of concept
- Reduce investor and governance risk
- Advance multiple assets without building infrastructure
- Bring value inflection points forward

- **Large and Mid Pharma**
- Improve portfolio performance at scale
- De-risk before delays occur
- Improve global consistency
- Supplement in-house capabilities without replacing them

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

Qualifying sponsor readiness — six requirements

- Engage IQVIA at the pre-IND or IND clinical development plan stage, including during protocol concept
- Deploy a full-service outsourcing model using IQVIA's processes and technology solutions
- Adopt protocol optimization, regulatory path strategy, and operational strategies including IQVIA technology solutions
- Collaboratively identify at-risk activities and begin next-phase planning when prior phase interim analysis go decision is made
- Establish parallel activities centrally and in-region for optimal risk parameters in database build and monitoring plan
- Run parallel global and regional activities to identify risks and incorporate them into database build and monitoring plans
- If a sponsor cannot meet these requirements, the accelerated timeline outcomes are not

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

Handling the two most predictable objections

Practice saying this naturally, not defensively

- **Objection — we have already started**
- Assess which phase they are in and whether the six requirements can still be met; Early Engagement is the clearest entry point, but start-up and conduct tools still add value

- **Objection — can you guarantee the two years**
- The answer is always no
- Correct language: up to two years, based on IQVIA analyses of client programs utilizing Predictive Clinical Development and adoption of IQVIA-recommended study delivery approaches; actual timelines vary based on program-specific factors and are not guaranteed

Activity — sponsor persona role-play

Tell your voice instructor which persona to play: Emerging Biopharma VP of Development or Large Pharma Head of Portfolio Operations
Your instructor will open with a realistic concern or objection
Respond using the messaging and qualification framework from this module
Ask your instructor to run the persona role-play with you — you can repeat the same scenario or switch personas

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

The conversational sequence — start to close

- Open with the burning platform — 8 to 10 years, published benchmark data
- Pivot to revenue math — Development time becomes commercial time, $1B to $2B framing
- Introduce the solution at headline level — Up to two years, two delivery modes, with the required qualifier
- Anchor to the relevant phase — The phase most relevant to where the sponsor is right now
- Qualify readiness — Against the six requirements
- Propose Early Engagement — As the immediate and concrete next step

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

Early Engagement as the close of the first conversation

The 11-to-12-week framework gives a sponsor something specific to say yes to
What they walk away with: feasibility view, endpoint tradeoff matrix, country scenario models, risk register, shared decision log
Describe all five without reading from a document — that fluency signals expertise
The sales message: let's start with the one decision where evidence and experience could create the most acceleration

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

What IQVIA is not claiming — stay inside these boundaries

- Not a guarantee of two years saved — always use the qualifier
- Not a replacement for sponsor in-house capabilities, especially for Large and Mid Pharma
- AI tools in development are not sold as current deliverables
- Staying within these boundaries builds sponsor trust and protects IQVIA's credibility

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

The core of every Predictive Clinical Development conversation

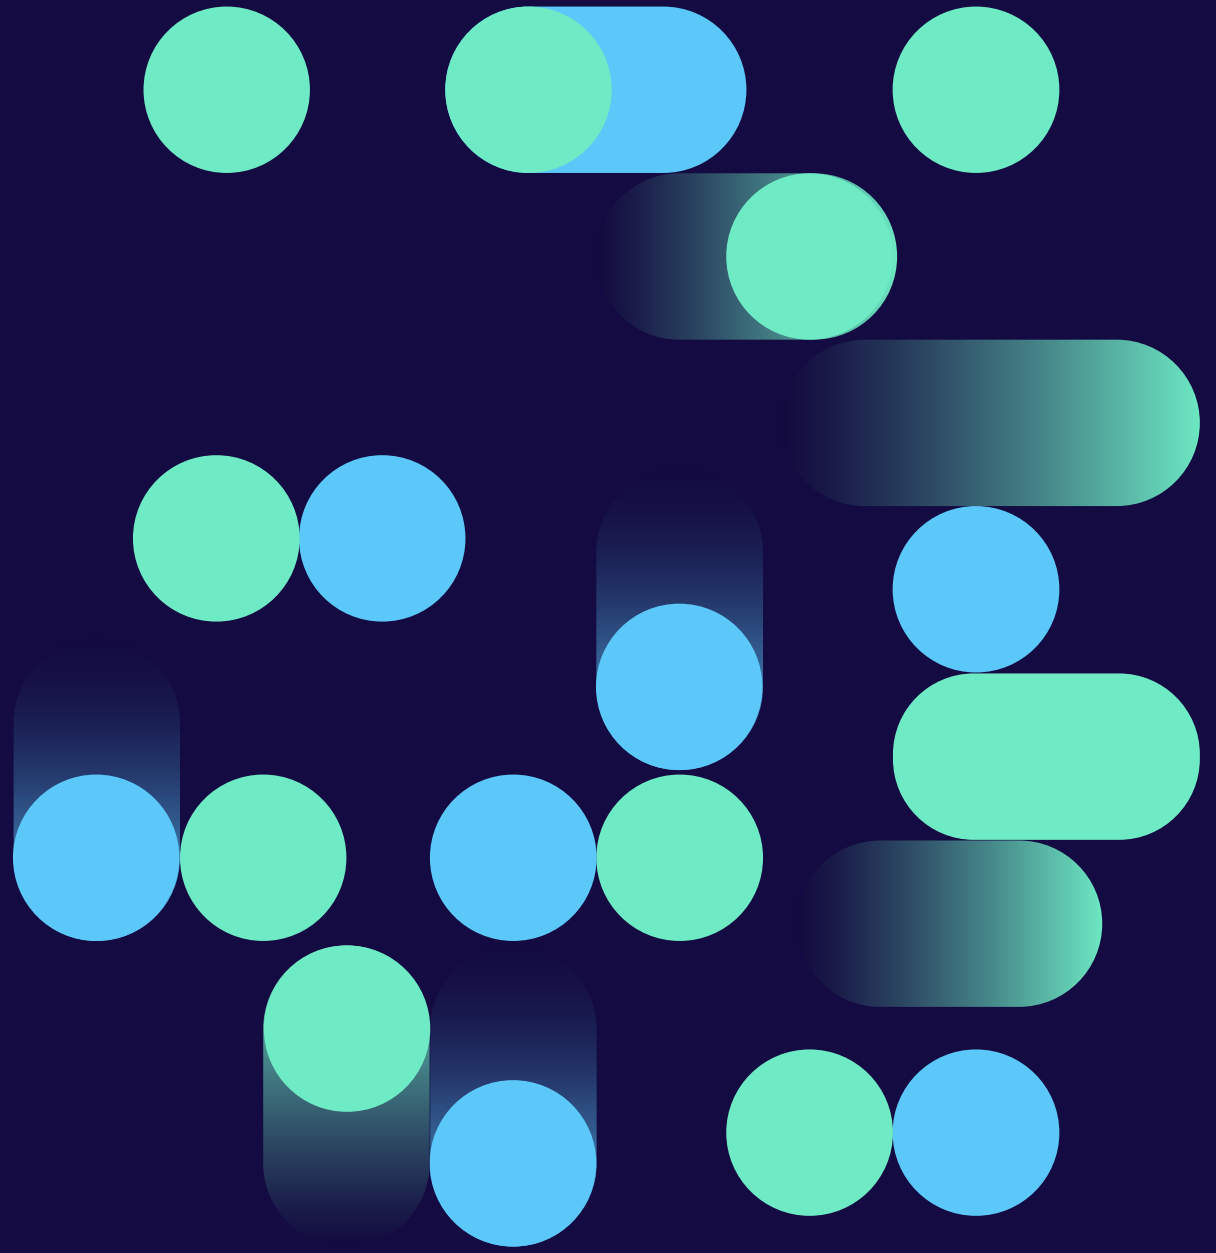

Burning platform — revenue math — solution and proof — entry point: that structure is the pitch
Watch: [ADD VIDEO LINK]

- **Burning platform**
- Here is what slow costs you
- **Revenue math**
- Here is what fast is worth
- **Solution and proof**
- Here is the specific path to getting there
- **Entry point**
- That structure is the pitch

© 2026. All rights reserved. IQVIA® is a registered trademark of IQVIA Inc. in the United States, the European Union, and various other countries.

Activity — capstone 90-second pitch

Deliver a 90-second pitch aloud to your voice instructor
Your instructor will give feedback on three dimensions: accuracy of the headline claim and disclaimer, correct persona identification and tailored message, and whether Early Engagement was described as the next step
Ask your instructor to listen to your capstone pitch — your instructor will invite you to try again if any dimension needs improvement

TAKEAWAY

Optional — test yourself before your first conversation

• If you want to confirm you have the key numbers and disclaimer language ready, your instructor can run a quick knowledge check

Just ask — nothing is recorded, and it is entirely for your own preparation

Optional: a private knowledge check is available — nothing is recorded

You are ready — here is your next move

Thank you for completing IQVIA Predictive Clinical Development Messaging
Your next step: identify one sponsor meeting on your calendar and determine which phase of the solution is most relevant to where they are right now
Prepare your proof point selection and your Early Engagement proposal before that meeting
The conversation starts with what slow costs them — you now know exactly what to say next
