

Clinical Trial Finance, Reimagined

Unify financial operations

Automate manual workflows

Orchestrate intelligent experiences

Scale globally with confidence

Clinical Trials Are Becoming More Complex

49%

Trial sites grew
since 2019

60%

Protocol amendments increased

Global footprints continue expanding

Financial processes remain fragmented

Fragmented Finance Slows Trial Execution

- Manual data entry creates errors
- Contract terms remain difficult to manage
- Delays strain site relationships
- Budgeting tools operate in silos
- Payment visibility is limited
- Late-stage delays can cost \$55K daily

CTFS Brings Clarity, Control, Confidence

Unified end-to-end financial platform

Flexible, scalable SaaS foundation

AI-powered workflow acceleration

Global trial support

Connected data and processes

Continuous innovation

One Platform Across Trial Finance

Budgeting and grant management

Contracting and payment terms

Forecasting and reconciliation

Site payments

Participant payments

Exception and anomaly management

From Manual Workflows to Orchestration

01

Ingest documents automatically

02

Extract relevant financial terms

03

Validate activity against agreements

04

Detect anomalies and exceptions

05

Route intelligent approvals

06

Improve cycle-time performance

Agentic AI Built for Transformation

Orchestrate multiple AI agents

Connect workflows through APIs

Extend capabilities using webhooks

Support forecasting and reconciliation

Enable explainable automation

Measure digital return on investment

CTFS Site Payments

Automates site payment workflows

Creates compliant invoices

Validates activity against CTA terms

Provides real-time payment visibility

Reduces disputes and follow-up

Supports insourced and hybrid models

A Better Experience for Sites

Predictable cash flow

Transparent payment status

Fewer administrative tasks

Consistent sponsor experiences

Faster issue resolution

Improved site satisfaction

Global by Design

200+

Geographies supported

180+

Countries for payments

Multi-currency capabilities

Local payment options

Tax and compliance support

Country-specific workflow flexibility

Proven Infrastructure and Outcomes

\$10.5B+

Payments processed

510K+

Budgets delivered

50%

Faster financial processing

\$3M

Annual savings potential

Rapid no-code deployment

Open API integration

Designed for Enterprise IT

Cloud-native architecture

API-first interoperability

Standards-based integrations

Connects EDC, CTMS, ERP

Audit-ready controls

Lower total cost ownership

Built to Scale with Your Portfolio

Modular capabilities

No complex reimplementation

Expand across financial workflows

Integrate existing technology

Support future AI agents

Enable continuous innovation

The CTFS Innovation Roadmap

Why CTFS, Why Now?

- Replace fragmented financial processes
- Demonstrate measurable operational ROI
- Improve sponsor-site transparency
- Accelerate trial execution
- Reduce technology redundancy
- Build the financial backbone

Start Your Transformation

01

Launch a focused CTFS pilot

03

Connect third-party AI agents

05

Quantify cost reduction

02

Integrate document extraction capabilities

04

Measure cycle-time improvements

06

Scale successful workflows enterprise-wide

Shape the Future Together

Orchestrate site-first operations

Deploy AI with confidence

Scale across global studies

Modernize clinical trial finance

Deliver clarity, control, confidence

IQVIA Clinical Trial Financial Suite The platform for intelligent, scalable trial finance.
